

Knobbed Cylinder Blocks

Activity Sheet · 3–6 yrs · Sensorial

Core Concept

Refining visual discrimination while strengthening the pincer grip required for writing.

Four Guided Activities

Single Block. Present one block. Remove cylinders left-to-right. Mix, then return each to its socket.

Blindfold Match. Have the child close their eyes and match cylinders to sockets by touch alone.

Two-Block Combo. Combine two blocks that vary in different dimensions. Sort into two families.

Pincer Practice. Emphasise the three-finger grip on the knob — this is the same grip used to hold a pencil.

Developmental Milestones to Observe

- Uses three-finger pincer grip
- Self-corrects placement
- Sustains focus for full cycle
- Chooses harder blocks over time

Observation Journal

Use the boxes below over a two-week period. One line per session.
